

COMPARING DIFFERENT KINDS OF MAPS

Comparing maps helps you to see relationships that you would not be able to see by looking at maps separately. Compare the maps below to answer the questions. If you need help, refer to pages 140–141 in your textbook.

1. What are some physical features of India?

2. On what kinds of physical features are most cities located?

3. In what areas are the fewest cities (or no cities) located?

4. What conclusions can you draw about the effect of physical features on the development of cities in India?
